Withdrawing or Deactivating an Existing Certificate of Study

A unit requesting a withdrawal or deactivation must clearly state if the program is to be deactivated or terminated. Termination is a final step that removes the program from the possibility of future reactivation. To deactivate a program means that it is held in abeyance until reactivation becomes feasible. In both cases no new admissions into the program are possible. Withdrawal of an existing certificate of study must be reviewed and approved by the same bodies that approved the existence of the degree. The proposal must include information on how the withdrawal will impact on the university, justification and an explanation of the withdrawal. Forms should be submitted for the permanent elimination of any courses necessitated by the withdrawal of the certificate.

Reinstating or Reactivating a Certificate of Study

The reinstatement or reactivation of a certificate of study must follow the same procedures and guidelines as the establishment of a certificate, except that the approval process ends with the Council on Academic Affairs for programs in effect prior to September 20, 1963.

Academic Certificate programs refer to those that require completion of courses with academic credits. Academic certificate programs are “stand-alone” or “independent” programs, which mean they do not need to be completed as part of an academic degree program. This is the primary distinction when compared to minor programs or specialization tracks which only can be completed coinciding with an academic degree.
