Subject: Integrative Approaches to Health and Wellness

Deb:

I am pleased to inform you that the proposal from the School of Allied Medical Professions to establish an **undergraduate minor in Integrative Approaches to Health and Wellness**, was approved by the Council on Academic Affairs at its meeting on December 6, 2006. Professor Brian Winer and I, as Chair and Vice Chair of the Council, presented the proposal on your behalf. Thank you for attending the meeting to respond to questions/comments.

No additional level of review/approval is necessary. This action will be included in the Council's next Annual Activities Report to the University Senate (June 2007).

This message represents my formal communication with you about this action. Please keep a copy of it for your file(s) on the proposal and I will do the same for the file in the Office of Academic Affairs.

If you have any questions please contact Professor Winer or me.

Congratulations and good luck with this exciting new curricular initiative!

Randy

RE: Integrative Approaches to Health & Wellness Undergraduate Minor

This memo represents the School of Physical Activity & Educational Services support for the Integrative Approaches to Health & Wellness Undergraduate Minor.

After carefully reviewing the proposed courses that have been identified to fit within the minor, I have received support from the faculty and staff who teach those courses and we feel this is a good opportunity for the School.

As Interim Director of the School I offer full support for the proposed Integrative Approaches to Health & Wellness Undergraduate Minor.

Subject: RE: Question

Electra

- i) if you can do the "new economy" one first that would help get it through the system.
- ii) let me revisit the Health and Wellness proposal and see what is not there that could/should be and get back to you no later than tomorrow.
- iii) you are done with Earthworks, but I will get input from the Research Committee soon, and so this one can hold until one of the later Autumn CAA meetings.
- iv) re: NELC - your subcommittee had no major substantive concerns about the proposal and I believe that Mark talked with the Graduate School about the faculty issue. While you were doing that, it had a first round review at the Regents and the proposal has now been revised accordingly. I got the revisions on Friday. So ... we will send the revisions out electronically today to all Sub C members. You all need to review the new version and see if you are ready to bring it to the full CAA later this Quarter.

Bottom line: I would work on "new economy" and the NELC proposal at your first meetings.

Subject: Question

Randy: Hope you don't mind my questions as I get going with this new role.

Re: Sub C work. I looked over the proposal to establish a minor in Integrative Approach to Health and Wellness proposal. Seems to me that the proposal was missing some crucial parts – the advising sheet and all relevant syllabi and relevant concurrence forms. Is this correct – or do they not need this info? If I am correct, I will request this from Deb Larsen. We will not discuss in Subcommittee until we receive this info.

The other minor in New Economy is ready to be discussed in Subcommittee – we will discuss and see if we need to meet with the contacts.

The remaining business – Earthworks looks ready to go from my viewpoint – I was planning to discuss in Subcommittee once before full council.

3

NEL proposal – we will need to start from scratch on this one – I don't have all of the info and what Mark sent is not helpful to my cluttered brain on this one – do you have any notes on this. I know that we had one concern about the faculty but I can't remember getting a response back on this.

We are trying to set-up a meeting for Oct 28th. Unfortunately with my travel schedule for Oct and scheduling conflicts of the others, this is the best we can do for now.

Let me know about the 1st question above. Thanks

EP

Re: Proposal for Minor in Integrative Approach to Health and Wellness

Dear Dr. Smith:

Enclosed is a proposal from the School of Allied Medical Professions for a minor in Integrative Approach to Health and Wellness. This minor would be available to all students in the university and capitalizes on interest among undergraduate students in complementary and alternative health care. In many colleges and universities, these topics are among the more popular courses offered. This minor requires two core courses through the School of Allied Medical Professions, while selecting at least three additional courses from an approved list of courses throughout the university. We expect this list to expand in the future. I fully support the minor and believe it would be very attractive to students in a number of different majors at Ohio State.

In developing the minor, Dr. Maryanna Klatt, the lead coordinator in the project, utilized a university-wide committee to solicit, review and approve coursework appropriate for inclusion in the minor. We worked particularly closely with the Colleges of the Arts and Sciences. Dr. Linda Schoen, a member of the committee, has provided a letter of support which is attached.

We are now submitting this proposal to the Council on Academic Affairs for review and, hopefully, approval. Please let me know if there is anything else you need. I look forward to hearing from you in the near future.

Sincerely,

Stephen L. Wilson, Ph.D.
Director
Associate Dean, College of Medicine and Public Health

The Integrative Approaches to Health and Wellness Minor is designed to study the nature, meaning, and possibilities of integrating Complementary and Alternative Medicine (CAM), into traditional western approaches to health care. An undergraduate who obtains the minor in Integrative Approaches to Health and Wellness will have an increased ability to navigate in the health care, wellness, or corporate arenas which are increasingly considering preventative, proactive approaches to health. These undergraduates will have delved into various paradigms of healing, as well as the western biomedical model, gaining a breadth of exposure to various approaches to health.

The Integrative Health and Wellness Minor consists of 21-25 credit hours of course work:

Required Core (10 credit hours)

ALLIED MED 307: The Evolving Art and Science of Medicine, U 5 , (a GEC under Culture and Ideas) and
ALLIED MED 607: The Role of Integrative Medicine in Society U G 5.

Elective Courses (11-15 credit hours)

Students must complete 11-15 additional credit hours. Select at least three courses from the following list, with at least 5 of these elective hours at the 300-level or above. Selection of coursework must be made in consultation with, and approved by the Integrative Approaches to Health and Wellness Coordinator, **insuring that each student's sequence of minor courses cover the scope of at least three of the five research domains outlined by the National Institute of Health (NIH) for CAM:**

Arts and Sciences minor program guidelines

The following guidelines govern minors.

Required for graduation No

Credit hours required A minimum of 20 (This minor requires 21)

Transfer credit hours allowed A maximum of 10

Overlap with the GEC Permitted, unless specifically disallowed by an individual minor program.

Overlap with the major Not allowed and

- The minor must be in a different subject than the major.
- The same courses cannot count on the minor and on the major.

Overlap between minors Each minor completed must contain 20 unique hours.

Grades required

- Minimum C- for a course to be listed on the minor.
- Minimum 2.00 cumulative point-hour ratio required for the minor.
- Course work graded Pass/Non-Pass cannot count on the minor.

Approval required The minor program description sheet indicates if the minor course work must be approved by:

- The academic unit offering the minor, or
- A college/school counselor.

Filing the minor program form The minor program form must be filed at least by the time the graduation application is submitted to a college/school counselor.

Changing the minor Once the minor program is filed in the college office, any changes must be approved by:

- The academic unit offering the minor, or
- A college/school counselor (depending on the minor).

Integrative Approaches to Health and Wellness Minor

Mission Statement:

The Integrative Approaches to Health and Wellness Minor seeks to study the nature, meaning, and possibilities of integrating Complementary and Alternative Medicine (CAM), into traditional western approaches to health care. Based on the five domains of scientific research outlined by the National Institute of Health for CAM, this undergraduate minor provides a focus of the scientific, cultural, social, economic, legal, medical, and experiential impact that Integrative Medicine is having on the American system of healthcare delivery. This minor is designed to provide a context for understanding this shift in healthcare for both the individual and larger society.

Analysis of the advent of Integrative Medicine, and the modalities within Complementary and Alternative Medicine, facilitates the development of research-based inquiry within this growing discipline that focuses on preventative, proactive approaches to health and wellness. This minor is not a training program for an undergraduate to become a practitioner in any specific Complementary or Alternative health practice, but is meant to provide a means to academically study the evolution of Integrative Medicine as an emerging cultural presence in American health delivery.

An undergraduate who obtains the minor in Integrative Approaches to Health and Wellness will have an increased ability to navigate in the health care, wellness, or corporate arenas which are increasingly paying attention to preventative, proactive approaches to health. These undergraduates will have delved into various paradigms of healing (alongside the western biomedical model), gaining a breadth of exposure to various approaches to health.

Student Population:

The Integrative Approaches to Health and Wellness Minor would be of significant benefit to students from a variety of colleges and major fields of study that intend to pursue work/study in the vast areas of health and wellness. This would range from a marketing major within the Fisher College of Business applying for a job as marketing director of a health club, to an exercise science major who could benefit from an academic background in CAM (Complementary and Alternative Medicine) modalities. A minor in Integrative Approaches to Health and Wellness would provide the academic framework allowing these students a unique and useful background in a competitive environment. CAM products, practices, educational classes, and consulting on the appropriateness of services for specific issues, are all part of a billion dollar business, and deserves research-based inquiry that the courses within the minor would provide. Providing real life experience, interaction through service learning opportunities and/or research at The Ohio State University Center for Integrative Medicine will be encouraged of students pursuing the Integrative Approaches to Health and Wellness Minor.

Similar Academic Programs at other Leading Universities:

Eighty universities have courses specifically in Complementary and Alternative Medicine, and many universities have similar majors and/or minors to the minor being proposed. At the undergraduate level, these universities include University of Wisconsin, Michigan State, Penn State, Yale, and University of Pennsylvania. Graduate specializations in Integrative Medicine exist at University of Minnesota, University of Michigan, University of Arizona, Columbia, Georgetown, University of Maryland, among many others. Eighty percent of American Medical schools include coursework in Complementary and Alternative Medicine. Additionally, Twenty-seven academic institutions have clinical centers for Complementary and Alternative Medicine.

Clinical Center on O.S.U.Campus:

The O.S.U. Center for Integrative Medicine is part of the O.S.U. Primary Care Network. Integrative Medicine incorporates the art and science of caring for the whole person: body, mind, and spirit, to treat and prevent disease, empowering patients to create a condition of optimal health. The Center is focused on providing person centered integrative health care to allow each person to reach their optimal health and potential. The integrative physicians are dual board certified in holistic medicine as well as their traditional specialty. The non-physician practitioners each bring high caliber skills and training to the person centered integrative health care and education.

Certified Practitioners from the Center for Integrative Medicine have academic appointments within the Department of Family Medicine and will serve as guest lecturers in various courses within the minor, offering expertise in their specific practice areas to students enrolled in the minor.

Goals for the Integrative Approaches to Health and Wellness Minor:

1. To establish a minor that investigates the increasing connection between Complementary and Alternative Medicine (CAM) and research-based western medicine, namely, Integrative Medicine.
2. To design a minor that provides the theoretical basis of the historical /cultural development of science-based medicine and Complementary and Alternative Medicine.
3. To explore the five research domains determined by the National Institute of Health in researching Complementary and Alternative Medicine to validate which of the CAM therapies meet the criteria of evidence-based medicine.
4. To construct a minor that encourages exposure to various CAM therapies through service learning at The Ohio State University Center For Integrative Medicine.
5. To utilize the research opportunities that are available at The O.S.U. Center for Integrative Medicine, with O.S.U. faculty associated with the center.

Objectives of the Integrative Approaches to Health and Wellness Minor:

Upon the successful completion of the Integrative Approaches to Health and Wellness Minor, the student will be able to:

1. Identify, explain, and appraise the historical/cultural roots of Biomedical Medicine and Complementary and Alternative Medicine.
2. Evaluate and analyze research on the efficacy and safety of various products and modalities based on the standards of evidence-based medicine, in addition to possible contraindications of specific modalities/products.
3. Synthesize a range of therapeutic/service-learning/research opportunities, which include, but are not limited to three of the five domains of Complementary and Alternative Medicine (CAM), as established by the National Center for Complementary and Alternative Medicine (NCCAM) of the National Institute of Health (NIH).
4. Articulate possible intersections between Allopathic medicine and CAM, exploring preventative and proactive approaches to health and wellness.

Coursework:

The Integrative Health Studies Minor consists of 21-25 credit hours of course work. Fifteen credit hours must be at the 300-level or above, with one course at the 500-level or above. Selection of coursework must be approved by the Integrative Approaches to Health and Wellness Coordinator, insuring that each student's sequence of minor courses cover the scope of at least three of the five research domains outlined by the NIH for CAM.

Process of curriculum/course selection and review:

The Minor will be coordinated through the School of Allied Medical Professions. An Integrative Approaches to Health and Wellness Minor Faculty Advisory Committee has been formed to select existing courses from a variety of departments on campus to augment the interdisciplinary nature of this minor. Representatives from Allied Medicine (Kay Wolf, PhD), Family Medicine (Maryanna Klatt, PhD), Psychology (Barbara Andersen, Ph.D.) Pharmacy (Bella Metha, Pharm.D), Education (Janet Buckworth, PhD), and Arts and Sciences (Linda Schoen, Ph.D, and Joel Shelton, M.A.) will serve as members of this advisory committee. The student representative is Neal Goldenberg, 4th year OSU medical student. Advising of students within the minor will be the responsibility of the Alternative Approaches to Health and Wellness Coordinator (coordinator will be from the School of Allied Medicine). Criteria will be established for course selection based upon a course's applicability to each of the five domains outlined by the NIH.

Required Core: 10 credit hours

ALLIED MED 307: The Evolving Art and Science of Medicine (U 5) (GEC under Culture and Ideas)

ALLIED MED 607: The Role of Integrative Medicine in Society (U/G 5)

Additional Coursework: 11-15 credit hours minimum

Select at least three courses from the following list, one of which must be 5 credit hours and at least a 300 level or above. All prerequisites must be satisfied for the courses selected. Selections from this list must be made in consultation with the Integrative Approaches to Health and Wellness Coordinator, as the topics need to cover three of the five domains:

- Alternative Health Systems
- Mind-Body Interventions
- Biologically Based Therapies
- Manipulative and Body-Based Methods
- Energy Therapies

The following courses have been evaluated and approved by the Integrative Approaches to Health and Wellness Minor Faculty Advisory Committee. These courses were judged by the committee to possess unique and academically challenging course content with a majority of course content relating to at least one of the 5 domains outlined by NCCAM. Each course is either free of prerequisites, or the instructor is willing to waive the prerequisite for a student in the minor. Some courses may fit into more than one domain, as was determined by the advisory committee, but most courses fit only one of the 5 domains outlined by the NIH :

Alternative Health Systems

Alternative medical systems are built upon complete systems of theory and practice. Often, these systems have evolved apart from and earlier than the conventional medical approach used in the United States. Examples of alternative medical systems that have developed in Western cultures include homeopathic medicine and naturopathic medicine. Examples of systems that have developed in non-Western cultures include traditional Chinese medicine and Ayurveda.

ED PAES 195.03 Yoga in Depth U 3

Mind Body Interventions

Mind-body medicine uses a variety of techniques designed to enhance the mind's capacity to affect bodily function and symptoms. Some techniques that were considered CAM in the past

have become mainstream (for example, patient support groups and cognitive-behavioral therapy). Other mind-body techniques are still considered CAM, including meditation, prayer, mental healing, and therapies that use creative outlets such as art, music, or dance.

Energy Therapies

Energy therapies involve the use of energy fields. They are of two types:

- **Biofield therapies** are intended to affect energy fields that purportedly surround and penetrate the human body. The existence of such fields has not yet been scientifically proven. Some forms of energy therapy manipulate biofields by applying pressure and/or manipulating the body by placing the hands in, or through, these fields. Examples include qi gong, Reiki, and Therapeutic Touch.
- **Bioelectromagnetic-based therapies** involve the unconventional use of electromagnetic fields, such as pulsed fields, magnetic fields, or alternating-current or direct-current fields.

Projected student enrollment in the minor:

It is projected that 25-50 students will be enrolled in the minor by the second year. It will be the responsibility of the minor coordinator to market and advertise the existence and value of the Integrative Approaches to Health and Wellness Minor to various departments. Every department from which courses were solicited expressed enthusiastic support of this proposed minor.
