From: Terry L. Gustafson, Special Assistant to the Executive Dean for Semester Conversion

Re: Arts and Sciences Program Proposals from the Natural and Mathematical Sciences Division

Arts and Sciences is pleased to submit the following programs from the Natural and Mathematical Sciences Division to the Office of Academic Affairs for conversion from quarters to semesters. The programs have been approved by the faculty members and chair of the originating unit, and reviewed and approved by the divisional advisory panel, a subcommittee of the ASC Committee on Curriculum and Instruction (CCI), and the full CCI. The vote for approval of all programs at the full CCI was unanimous.

Program Name	Academic Plan Code	Conversion Designation	CCI Approval	Last Revision
Astronomy and Astrophysics BS	ASTRON-BS	Converted	4/2/2011	6/12/2009
Astronomy and Astrophysics Minor	ASTRON_MN	Converted	2/28/2011	Prior to 2006
Evolution and Ecology Minor	EVOLECO-MN	Re-envisioned	3/6/2011	Prior to 2006
Microbiology BA	MICRBIO-BA	Re-envisioned	3/15/2011	3/6/2009
Microbiology BS	MICRBIO-BS	Re-envisioned	3/15/2011	3/6/2009
Microbiology Minor	MICROBIO-MN	Re-envisioned	3/11/2011	Prior to 2006
Physics BS	PHYSICS-BS	Converted	4/2/2011	Prior to 2006
Physics Minor	PHYSICS-MN	Converted	3/6/2011	Prior to 2006
Statistics Minor	STAT-MN	Converted	2/21/2011	Prior to 2006
Zoology BA	ZOOLOGY-BA	Re-envisioned	1/31/2011	Prior to 2006
Zoology BS	ZOOLOGY-BS	Re-envisioned	1/31/2011	Prior to 2006
Zoology Minor	ZOOLOGY-MN	Re-envisioned	3/6/2011	Prior to 2006

Arts and Sciences General Education (GE) Program: The GE program for untagged B.A. and B.S. degrees in Arts and Sciences was approved by the Council on Academic Affairs on May 26, 2010, after receiving approval from the Arts and Sciences Faculty Senate. All the programs presented here follow the approved GE program.

College of Arts and Sciences Transition Policy: The College of Arts and Sciences is committed to the principles outlined in the university's Pledge to Undergraduate Students. Each unit has a plan on how best to assist its majors and minors through the transition. And the Arts and Sciences Academic Advising Services will advise students on how to transition their GE program. Dual advising is the existing process used in Arts and Sciences and will continue under semesters.

PROGRAM REQUEST
Astronomy and Astrophysics

Last Updated: Andereck, Claude David
03/07/2011

Fiscal Unit/Academic Org	Astronomy - D0614
Administering College/Academic Group	Mathematical And Physical Sci
Co-administering College/Academic Group	Arts And Sciences
Semester Conversion Designation	Converted with minimal changes to program goals and/or curricular requirements (e.g., sub-plan/specialization name changes, changes in electives and/or prerequisites, minimal changes in overall structure of program, minimal or no changes in program goals or content)
Current Program/Plan Name	Astronomy
Proposed Program/Plan Name	Astronomy and Astrophysics
Program/Plan Code Abbreviation	ASTRON-BS
Current Degree Title	Bachelor of Science

Credit Hour Explanation

Program credit hour requirements		A) Number of credit hours in current program (Quarter credit hours)	B) Calculated result for 2/3rds of current (Semester credit hours)	C) Number of credit hours required for proposed program (Semester credit hours)	D) Change in credit hours
Total minimum credit hours required for completion of program		73	48.7	45	3.7
Required credit hours offered by the unit	Minimum	22	14.7	13	1.7
	Maximum	22	14.7	13	1.7
Required credit hours offered outside of the unit	Minimum	51	34.0	32	2.0
	Maximum	51	34.0	33	1.0
Required prerequisite credit hours not included above	Minimum	30	20.0	27	7.0
	Maximum	35	23.3	27	3.7

Explain any change in credit hours if the difference is more than 4 semester credit hours between the values listed in columns B and C for any row in the above table

The minimum required prerequisites was lower under quarters because it was possible to take an accelerated first year calculus sequence (Math 161-162) instead of the regular sequence Math 151-152-153. This option is not available in the semester calendar. Also, CSE 202 was part of the major program on the quarter calendar: on the semester calendar, it is replaced by CSE 1222, which as a 1000-level course is a prerequisite.

Program Learning Goals

Note: these are required for all undergraduate degree programs and majors now, and will be required for all graduate and professional degree programs in 2012. Nonetheless, all programs are encouraged to complete these now.

- Program Learning Goals**
- Undergraduate Astronomy and Astrophysics majors acquire a basic mastery of the four fundamental areas of physics.
 - Undergraduate Astronomy and Astrophysics majors develop powerful analytical and problem solving skills in areas involving astrophysics, physics, and mathematics.
 - Undergraduate Astronomy and Astrophysics majors acquire a basic mastery of the fundamentals of astronomy and astrophysics.
 - Undergraduate Astronomy and Astrophysics majors acquire a basic mastery of data reduction and error analysis.
 - Undergraduate Astronomy and Astrophysics majors are able to effectively communicate their physical understanding both professionally and colloquially (orally and in writing).

Assessment

Status: PENDING

PROGRAM REQUEST
Astronomy and Astrophysics

Last Updated: Andereck, Claude David
03/07/2011

Assessment plan includes student learning goals, how those goals are evaluated, and how the information collected is used to improve student learning. An assessment plan is required for undergraduate majors and degrees. Graduate and professional degree programs are encouraged to complete this now, but will not be required to do so until 2012.

Is this a degree program (undergraduate, graduate, or professional) or major proposal? Yes

Does the degree program or major have an assessment plan on file with the university Office of Academic Affairs? Yes

Summarize how the program's current quarter-based assessment practices will be modified, if necessary, to fit the semester calendar.

Assessment plan includes student learning goals, how these goals are evaluated, and how the information is collected is used to improve student learning.

Program Specializations/Sub-Plans

If you do not specify a program specialization/sub-plan it will be assumed you are submitting this program for all program specializations/sub-plans.

Pre-Major

Does this Program have a Pre-Major? No

Larry Krissek
Chair, Arts and Sciences CCI

Dear Larry:

It is a pleasure to forward to you the proposal for the BS major in Astrophysics under semesters. The major has been minimally modified from its present quarter version. Please note that the Department of Astronomy is requesting that the name of the major be changed from Astronomy to Astronomy and Astrophysics. The Department of Physics and the Department of Astronomy have a signed MOU (included) that addresses how they will administer the program going forward.

Beyond my own review of the documents, the proposal has been discussed by colleagues from other NMS units at a meeting on October 27, 2010. Feedback from that discussion, and from both the CCI Sciences Subcommittee and the CCI itself, has been incorporated in the proposal.

If you have any questions, I would be happy to address them.

Sincerely,

David Andereck
Professor of Physics
Associate Dean of Natural and Mathematical Sciences, College of Arts and Sciences

To: Larry Krissek, CCI Chair
From: James Fredal, CCI Sciences Subcommittee Chair
Re: Astronomy and Astrophysics BS Semester Conversion Proposal

Date: Feb 25, 2011

Larry:

The Sciences subcommittee met to review and unanimously approved the proposed semester conversion plan for the Astronomy (as proposed, the Astronomy and Astrophysics) BS major. The major has undergone minimal revisions during the transition. The proposal explains the impetus behind the requested name change to Astronomy and Astrophysics, which reflects the “strong commonalities” that the program shares with the Advanced Physics option of the Physics major. The proposal therefore includes a memorandum of understanding that describes the proposed BS as an interdisciplinary degree, jointly managed by Astronomy and Physics with Astronomy as the home department. This change will include the inclusion of a member of the Physics department on the Undergraduate and Curriculum committees of the Department of Astronomy, and vice versa.

The major was last revised in 2009 with the elimination of Phys 664 (Theoretical Mechanics) and the addition of CSE 202 (Intro to C++ Programming) and Astronomy 295 (an entry level undergraduate seminar) as requirements.

In other ways, the program converts with minimal changes to program goals and curricular requirements.

After the committee approved the proposal, I noticed that the transition plans use GEC for semester courses rather than GE, and that the course list gives a subtotal for the Physics requirement of 27 hours. A note might be added that this total is 26 hours if Phys 3470 is taken.

As these are small changes, and in light of the committee’s approval, I’m sending the proposal forward to the CCI with a recommendation for approval.

Thank you.
Jim F.

Re: Astronomy Undergraduate Major Program under Semesters

Dear colleagues,

The Department of Astronomy currently offers two degree programs, a Bachelor of Science with a major in Astronomy and Doctor of Philosophy in Astronomy.

The Department additionally offers a minor program in Astronomy. The Department also awards a Master's of Science in Astronomy to students who complete the required graduate core courses and pass an oral examination, usually the same examination that admits students to candidacy for the PhD; students are not admitted for a Master's degree only, so we do not list this as a separate program.

As outlined in the following Program Rationale, we propose to change the name of the undergraduate major and minor programs from "Astronomy" to "Astronomy and Astrophysics." On account of the significant physics content of the major and minor programs in astronomy, we are proposing that the "Astronomy and Astrophysics" major and minor programs be recognized as interdisciplinary programs, jointly managed by the Departments of Physics and Astronomy, with the Department of Astronomy as the home department, as described in the accompanying Memorandum of Understanding between the Departments of Physics and Astronomy.

Curricular changes are made through the Department's standing Curriculum Committee upon approval by the entire regular faculty. In the current conversion to semesters, the Curriculum Committee did not recommend any changes to the undergraduate major program because the current curriculum is deemed to be academically sound, up to date, and will transfer transparently to a semester schedule.

The plan proposed here has been presented to the Astronomy faculty and they have voted to support it.

As chair of the Department, I recommend approval of the undergraduate major program as submitted here.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Bradley M. Peterson".

Bradley M. Peterson
Professor and Chair

MEMORANDUM OF UNDERSTANDING

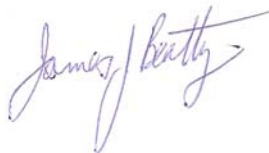

The Departments of Astronomy and Physics recognize that the undergraduate major program in astronomy has strong commonalities with the Advanced Physics Option of the undergraduate major in physics. In both programs, the majors are being prepared for graduate work that requires background at the intermediate to advanced level in classical mechanics, quantum mechanics, electricity and magnetism, and thermodynamics and statistical mechanics, and both majors require similar a background in advanced mathematics. The principal differences are that physics majors take additional advanced laboratory classes and astronomy majors take a minimum of four additional courses in astronomy and astrophysics. We note that many students choose to double-major in physics and astronomy, and this has historically been encouraged by both departments. But given the large physics component to the astronomy major program, the astronomy major is essentially a joint program that is administered by the Department of Astronomy.

The Departments of Physics and Astronomy agree that the educational opportunities afforded our joint majors and our respective majors are enhanced by stronger interaction between the two programs. Since the Astronomy major already includes significant Physics content, we propose that it be formally recognized as an interdisciplinary program, jointly managed by the Departments of Astronomy and Physics, with Astronomy as the home department. Students in this interdisciplinary program would be considered as majors in both departments, although they would choose an advisor (or be assigned one) from just one department. To formalize this change, the Departments also agree that the name of the astronomy major program will change from "Astronomy" to "Astronomy and Astrophysics," in recognition of the large physics and astrophysics component of the astronomy major program. The name of the undergraduate minor in astronomy will also be changed from "Astronomy" to "Astronomy and Astrophysics." It is proposed that these changes take effect no later than Autumn Semester 2012, as a part of the change in the academic calendar from quarters to semesters.

As a practical matter, the two Departments agree that communication on curricular and scheduling issues can be improved by assigning a member of the Physics Department Undergraduate Studies Committee as a voting member of the Astronomy Department Undergraduate Studies and Curriculum committees and assigning a member of the Astronomy Department Undergraduate Studies and Curriculum committees as a voting member of the Physics Department Undergraduate Studies Committee. It is proposed that this take effect no later than Autumn Quarter 2011.

Bradley M. Peterson
Professor and Chair of Astronomy

James J. Beatty
Professor and Chair of Physics

Program Rationale

The Astronomy Undergraduate Major program maps easily from quarters to semesters. Nearly all the Astronomy courses are 5-credit hours and these transfer trivially to 3-credit hour semester courses. The one course that does not is Astron 295, a 1-credit hour seminar for first-year prospective majors. This informal seminar will be reduced from 20 sessions under the quarter calendar to 14 under semesters.

We have examined the proposed changes in Physics, Math, and CSE (in which our students take both prerequisites and major courses), and our conversion plans are consistent with theirs.

The only change we propose is changing the name of the program from “Astronomy” to “Astronomy and Astrophysics”: this is a long-overdue change that better represents what our students are learning. “Astrophysics” is less likely to be misunderstood by prospective employers of our BS students; many people equate “astronomy” with stargazing or astrophotography or, even worse, “astrology,” and this more accurate degree name will better serve our students who do not continue in the field.

The undergraduate major program was most recently revised in 1997, with the addition of Astronomy 681 and 682 to the major program. Minor changes in 2009 include elimination of Phys 664 (Theoretical Mechanics) as a required course, addition of CSE 202 (Introduction to C++ Programming), and addition of two units of Astron 295 (Undergraduate Seminar) as a degree requirement.

Astronomy and Astrophysics Major Program Semesters	Credit Hours	Notes

	GEC	5		Third Writing Course	3		elective	3	
		14			12			13	
	Total hours:	207							

Note: Honors version of any course may be substituted.

Course Conversion Table						
	Semester Course Number	Course Title	Semester Units	Quarter Equivalent Course Number	Quarter Credits	Notes
Astronomy	Astron 2193	individual studies	var	Astron 293	var	Same content
	Astron 2194	group studies	var	Astron 294	var	Same content
	Astron 2291	Basic Astrophysics and Planetary Astronomy	3	Astron 291	5	Same content
	Astron 2292	Stellar, Galactic, and Extragalactic Astronomy and Astrophysics	3	Astron 292	5	Same content
	Astron 2895	Seminar	1	Astron 295	1	Some content reduction as requirement reduced from two quarters to one semester.
	Astron 3350	Methods of Astronomical Observation and Data Analysis	3	Astron 350	5	Same content
	Astron 4193	individual studies	var	Astron 693	var	Same content
	Astron 4194	group studies	var	Astron 694	var	Same content
	Astron 4998	non-thesis research	var	Astron 693	var	Same content
	Astron 4998H	honors non-thesis research	var	Astron 693	var	Same content
	Astron 4999	thesis research	var	Astron 693	var	Same content
	Astron 4999H	honors thesis research	var	Astron H783	var	Same content
	Astron 5681	Principles of Stellar Evolution and Nucleosynthesis	3	Astron 681/ Phys 681	5	Same content
	Astron 5682	Introduction to Cosmology	3	Astron 682/ Phys 682		Same content
Programming	CSE 1222	Intro to C++	2	CSE 202	4	Same content
Mathematics	Math 1151	Calculus I	5	Math 151	5	Semester sequence has same content as quarter sequence
	Math 1172	Engineering Mathematics A	5	Math 152	5	
				Math 153	5	
	Math 2173	Engineering Mathematics B	5	Math 254	5	Combines material from Math 254, 152, and 153
	Math 2174	Engineering Mathematics C	3	Math 415	4	Merges Math 415 and Math 568
	Math 4551	Vector Analysis	3	Math 513	3	Same content
Physics	Phys 1250/1250H	Mechanics, Thermal Physics, Waves	5	Phys 131	5	Semester sequence has same content as quarter sequence
	Phys 1251/1251H	E&M, Optics, Modern Physics	5	Phys 132	5	
				Phys 133	5	
	Phys 2300	Dynamics of Particles and Waves I	4	Phys 261	4	Semester sequence has same content as quarter sequence
	Phys 2301	Dynamics of Particles and Waves II	4	Phys 262	4	
				Phys 263	4	
	Phys 3470	Modern Optics	3	Phys 570	4	Same content
	Phys 3700	Methods in Experimental Physics	3	Phys 416	4	Same content
	Phys 5300	Theoretical Mechanics	4	Phys 664	4	Enhanced content
	Phys 5400/5400H	E&M I	4	Phys 555	4	Semester sequence has same content as quarter sequence
	Phys 5401H	E&M II	4	Phys 656	4	
				Phys 657	4	
	Phys 5500/5500H	Quantum Mechanics I	4	Phys 631	4	Semester sequence has same content as quarter sequence
	Phys 5501H	Quantum Mechanics II	4	Phys 632	4	
				Phys 633	4	
Phys 5600	Statistical Physics	4	Phys 621	4	Semester course has all of 621 and part of 622	
			Phys 622	4		

Note: Honors versions of any course may be substituted.

Transition Policy:

Students who began their degree under quarters will not be penalized as the university moves to a semester schedule, either in terms of progress towards their degree or their expected date of graduation. No special transition plan is necessary for the major or minor courses in Astronomy: nearly all of these courses translate directly from 5-hour quarter courses to 3-hour semester courses. The only exception is Astron 295, a 1-hour quarter seminar that students must take twice. This will be replaced with a 1-hour semester seminar, Astron 2895, which students will take only once. As of Autumn 2012, any student who has completed either one quarter of Astron 295 or one semester of Astron 2895 will be deemed to have met the seminar requirement.

Transition policies for the required or prerequisite physics and math courses will be established by the Departments of Physics and Mathematics, respectively. Students can minimize their own transition difficulties by making sure of the following:

2011-12 first-year students should make certain that they have completed Mathematics 153 and Physics 133 by no later than Spring 2012.

2011-12 second-year students should make certain that they complete Math 254, 415, 513, and 568 and Phys 263 by no later than Spring 2012,

2011-12 third year students should make certain that they complete Phys 632 and 656 by no later than Spring 2012.

Astronomy advisors will remind astronomy and astrophysics majors of the necessity to complete these course sequences throughout the 2011-12 academic year.

Transition Plan for 2011-12 First-Year Students (Class of 2015)											
	Course	Credit Hours	Notes		Course	Credit Hours	Notes		Course	Credit Hours	Notes

Writing	writing courses					intermediate

Goals:

- #1 Undergraduate Astronomy and Astrophysics majors acquire a basic mastery of the four fundamental areas of physics.
- #2 Undergraduate Astronomy and Astrophysics majors develop powerful analytic and problem solving skills in areas involving astrophysics, physics, and mathematics.
- #3 Undergraduate Astronomy and Astrophysics majors acquire a basic mastery of the fundamentals of astronomy and astrophysics.
- #4 Undergraduate Astronomy and Astrophysics majors acquire a basic mastery of data reduction and error analysis.
- #5 Undergraduate Astronomy and Astrophysics majors are able to effectively communicate their physical understanding both professionally and colloquially (orally and in writing).
