Re: Arts and Sciences Program Proposals from the Natural and Mathematical Sciences Division

Arts and Sciences is pleased to submit the following programs from the Natural and Mathematical Sciences Division to the Office of Academic Affairs for conversion from quarters to semesters. The programs have been approved by the faculty members and chair of the originating unit, and reviewed and approved by the divisional advisory panel, a subcommittee of the ASC Committee on Curriculum and Instruction (CCI), and the full CCI. The vote for approval of all programs at the full CCI was unanimous.

Program Name	Academic Plan Code	Conversion Designation	CCI Approval	Last Revision
Astronomy and Astrophysics BS	ASTRON-BS	Converted	4/2/2011	6/12/2009
Astronomy and Astrophysics Minor	ASTRON_MN	Converted	2/28/2011	Prior to 2006
Evolution and Ecology Minor	EVOLECO-MN	Re-envisioned	3/6/2011	Prior to 2006
Microbiology BA	MICRBIO-BA	Re-envisioned	3/15/2011	3/6/2009
Microbiology BS	MICRBIO-BS	Re-envisioned	3/15/2011	3/6/2009
Microbiology Minor	MICROBIO-MN	Re-envisioned	3/11/2011	Prior to 2006
Physics BS	PHYSICS-BS	Converted	4/2/2011	Prior to 2006
Physics Minor	PHYSICS-MN	Converted	3/6/2011	Prior to 2006
Statistics Minor	STAT-MN	Converted	2/21/2011	Prior to 2006
Zoology BA	ZOOLOGY-BA	Re-envisioned	1/31/2011	Prior to 2006
Zoology BS	ZOOLOGY-BS	Re-envisioned	1/31/2011	Prior to 2006
Zoology Minor	ZOOLOGY-MN	Re-envisioned	3/6/2011	Prior to 2006

Arts and Sciences General Education (GE) Program: The GE program for untagged B.A. and B.S. degrees in Arts and Sciences was approved by the Council on Academic Affairs on May 26, 2010, after receiving approval from the Arts and Sciences Faculty Senate. All the programs presented here follow the approved GE program.

College of Arts and Sciences Transition Policy: The College of Arts and Sciences is committed to the principles outlined in the university's Pledge to Undergraduate Students. Each unit has a plan on how best to assist its majors and minors through the transition. And the Arts and Sciences Academic Advising Services will advise students on how to transition their GE program. Dual advising is the existing process used in Arts and Sciences and will continue under semesters.

Status: PENDING

PROGRAM REQUEST
Astronomy and Astrophysics Minor

Last Updated: Andereck, Claude David
02/20/2011

Fiscal Unit/Academic Org	Astronomy - D0614
Administering College/Academic Group	Mathematical And Physical Sci
Co-administering College/Academic Group	Arts And Sciences
Semester Conversion Designation	Converted with minimal changes to program goals and/or curricular requirements (e.g., sub-plan/specialization name changes, changes in electives and/or prerequisites, minimal changes in overall structure of program, minimal or no changes in program goals or content)
Current Program/Plan Name	Astronomy Minor
Proposed Program/Plan Name	Astronomy and Astrophysics Minor
Program/Plan Code Abbreviation	ASTRON-MN
Current Degree Title	

Credit Hour Explanation

Program credit hour requirements		A) Number of credit hours in current program (Quarter credit hours)	B) Calculated result for 2/3rds of current (Semester credit hours)	C) Number of credit hours required for proposed program (Semester credit hours)	D) Change in credit hours
Total minimum credit hours required for completion of program		20	13.3	12	1.3
Required credit hours offered by the unit	Minimum	15	10.0	9	1.0
	Maximum	20	13.3	12	1.3
Required credit hours offered outside of the unit	Minimum	0	0.0	0	0.0
	Maximum	8	5.3	4	1.3
Required prerequisite credit hours not included above	Minimum	34	22.7	25	2.3
	Maximum	39	26.0	28	2.0

Program Learning Goals

Note: these are required for all undergraduate degree programs and majors now, and will be required for all graduate and professional degree programs in 2012. Nonetheless, all programs are encouraged to complete these now.

Program Learning Goals

Assessment

Assessment plan includes student learning goals, how those goals are evaluated, and how the information collected is used to improve student learning. An assessment plan is required for undergraduate majors and degrees. Graduate and professional degree programs are encouraged to complete this now, but will not be required to do so until 2012.

Is this a degree program (undergraduate, graduate, or professional) or major proposal? No

Program Specializations/Sub-Plans

If you do not specify a program specialization/sub-plan it will be assumed you are submitting this program for all program specializations/sub-plans.

Pre-Major

Does this Program have a Pre-Major? No

Larry Krissek
Chair, Arts and Sciences CCI

Dear Larry:

It is a pleasure to forward to you the proposal for the minor in Astrophysics under semesters. The minor has been minimally modified from its present quarter version. Please note that the Department of Astronomy is requesting that the name of the minor be changed from Astronomy to Astronomy and Astrophysics. The Department of Physics and the Department of Astronomy have a signed MOU (included) that addresses how they will administer the program going forward.

Beyond my own review of the documents, the proposal has been discussed by colleagues from other NMS units at a meeting on October 27, 2010. Feedback from that discussion, and from the CCI Sciences Subcommittee has been incorporated in the proposal.

If you have any questions, I would be happy to address them.

Sincerely,

David Andereck
Professor of Physics
Associate Dean of Natural and Mathematical Sciences, College of Arts and Sciences

Re: Astronomy Undergraduate Minor Program under Semesters

Dear colleagues,

The Department of Astronomy offers two degree programs, a Bachelor of Science with a major in Astronomy and Doctor of Philosophy in Astronomy.

The Department additionally offers a minor program in Astronomy. The Department also awards a Master's of Science in Astronomy to students who complete the required graduate core courses and pass an oral examination, usually the same examination that admits students to candidacy for the PhD; students are not admitted for a Master's degree only, so we do not list this as a separate program.

As outlined in the following Program Rationale, we propose to change the name of the undergraduate major and minor programs from "Astronomy" to "Astronomy and Astrophysics." On account of the significant physics content of the major and minor programs in astronomy, we are proposing that the "Astronomy and Astrophysics" major and minor programs be recognized as interdisciplinary programs, jointly managed by the Departments of Physics and Astronomy, with the Department of Astronomy as the home department, as described in the accompanying Memorandum of Understanding between the Departments of Physics and Astronomy.

Curricular changes are made through the Department's standing Curriculum Committee upon approval by the entire regular faculty. In the current conversion to semesters, the Curriculum Committee did not recommend any changes to the undergraduate minor program because the current curriculum is deemed to be academically sound, up to date, and will transfer transparently to a semester schedule.

The plan proposed here has been presented to the Astronomy faculty and they have voted to support it.

As chair of the Department, I recommend approval of the undergraduate minor program as submitted here.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Bradley M. Peterson".

Bradley M. Peterson
Professor and Chair

MEMORANDUM OF UNDERSTANDING

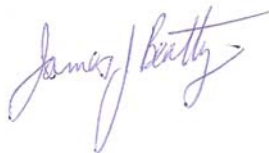

The Departments of Astronomy and Physics recognize that the undergraduate major program in astronomy has strong commonalities with the Advanced Physics Option of the undergraduate major in physics. In both programs, the majors are being prepared for graduate work that requires background at the intermediate to advanced level in classical mechanics, quantum mechanics, electricity and magnetism, and thermodynamics and statistical mechanics, and both majors require similar a background in advanced mathematics. The principal differences are that physics majors take additional advanced laboratory classes and astronomy majors take a minimum of four additional courses in astronomy and astrophysics. We note that many students choose to double-major in physics and astronomy, and this has historically been encouraged by both departments. But given the large physics component to the astronomy major program, the astronomy major is essentially a joint program that is administered by the Department of Astronomy.

The Departments of Physics and Astronomy agree that the educational opportunities afforded our joint majors and our respective majors are enhanced by stronger interaction between the two programs. Since the Astronomy major already includes significant Physics content, we propose that it be formally recognized as an interdisciplinary program, jointly managed by the Departments of Astronomy and Physics, with Astronomy as the home department. Students in this interdisciplinary program would be considered as majors in both departments, although they would choose an advisor (or be assigned one) from just one department. To formalize this change, the Departments also agree that the name of the astronomy major program will change from "Astronomy" to "Astronomy and Astrophysics," in recognition of the large physics and astrophysics component of the astronomy major program. The name of the undergraduate minor in astronomy will also be changed from "Astronomy" to "Astronomy and Astrophysics." It is proposed that these changes take effect no later than Autumn Semester 2012, as a part of the change in the academic calendar from quarters to semesters.

As a practical matter, the two Departments agree that communication on curricular and scheduling issues can be improved by assigning a member of the Physics Department Undergraduate Studies Committee as a voting member of the Astronomy Department Undergraduate Studies and Curriculum committees and assigning a member of the Astronomy Department Undergraduate Studies and Curriculum committees as a voting member of the Physics Department Undergraduate Studies Committee. It is proposed that this take effect no later than Autumn Quarter 2011.

Bradley M. Peterson
Professor and Chair of Astronomy

James J. Beatty
Professor and Chair of Physics

Program Rationale

The Astronomy Undergraduate Minor program maps easily from quarters to semesters. All the Astronomy courses are 5-credit hours and these transfer trivially to 3-credit hour semester courses

We have examined the proposed changes in Physics and Math (in which our students take prerequisites and minor courses), and our conversion plans are consistent with theirs. Because of the increased content of the Physics courses at the 2000 level or above, we now require only ONE course (in Physics or Astronomy) as an elective and, for greater consistency with the Physics minor and for increased flexibility for the student, we have included a broad range of high-level Physics courses in the list of possible electives.

The only other change we propose is changing the name of the program from “Astronomy” to “Astronomy and Astrophysics”: this is a long-overdue change that better represents what our students are learning. “Astrophysics” is less likely to be misunderstood by prospective employers of our BS students; many people equate “astronomy” with star-gazing or astrophotography or, even worse, “astrology,” and this more accurate degree name will better serve our students who do not continue in the field.

The undergraduate minor program was most recently revised in 1997, with the addition of Astronomy 681 and 682 as electives in the minor program.

Astronomy and Astrophysics Minor Program Semesters	Credit Hours

	Phys 5501H	Quantum Mechanics II	4	Phys 632	4	
				Phys 633	4	
	Phys 5600	Statistical Physics	4	Phys 621	4	Semester course has all of 621 and part of 622
				Phys 622	4	

Note: Honors version of any course may be substituted.

Transition Policy:

Students who began their degree under quarters will not be penalized as the university moves to a semester schedule, either in terms of progress towards their degree or their expected date of graduation. No special transition plan is necessary for the minor courses in Astronomy: nearly all of these courses translate directly from 5-hour quarter courses to 3-hour semester courses. Transition policies for the required or prerequisite physics and math courses will be established by the Departments of Physics and Mathematics, respectively.

Students can minimize their own transition difficulties by making sure of the following:

2011-12 first-year students should make certain that they have completed Mathematics 153 and Physics 133 by no later than Spring 2012.

2011-12 second-year students should make certain that they complete Math 254 and 415 and Phys 263 by no later than Spring 2012.

2011-12 third year students should make certain that they complete Phys 632 and 656 by no later than Spring 2012.

Astronomy advisors will remind astronomy and astrophysics minors of the necessity to complete these course sequences throughout the 2011-12 academic year.
