Sarah Odum, Curriculum Coordinator

From: Bryan Warnick, Associate Dean of Academic Affairs

RE: SPECIALIZATION DEACTIVATION: HEALTH PROMOTION SPECIALIZATION IN BSED EX SCI

The faculty and administration of the College of Education and Human Ecology (EHE) approve the proposal to deactivate the Health Promotion specialization in the Bachelor of Science in Education, Exercise Science Education major in the Department of Human Sciences. The proposal was approved by the EHE Curriculum Committee.

Documents included with this proposal include:

1. Department support email
2. Program deactivation request
3. Current program sheet

EHE approves the proposal to deactivate the Health Promotion specialization in the Bachelor of Science in Education, Exercise Science Education major in the Department of Human Sciences and requests approval from the Council on Academic Affairs. If there are any questions, please contact me at warnick.11@osu.edu or our curriculum coordinator, Sarah Odum, at odum.11@osu.edu.

Dear Sarah,

On April 20, 2015 the members of the Undergraduate Studies Committee in the Department of Human Sciences voted unanimously to officially deactivate the Health Promotion Specialization in the undergraduate Exercise Science major. Attached to this letter is a letter from Dr. Steve Devor, coordinator of the undergraduate Exercise Science major, articulating the reasoning behind the deactivation of this Specialization. It is also important to note that when the HPNES specialization was proposed at the time of semester conversion, it came with the stipulation that the HP specialization would be deactivated – which we are now doing.

I'm requesting that this issue come before the EHE College Curriculum Committee as soon as it is feasible.

Please contact me at your earliest convenience if you have any questions regarding the deactivation of the Health Promotion Specialization in the undergraduate Exercise Science Major.

Best wishes,

H. Eugene Folden, Ph.D.

Dear Dr. Folden,

Please accept this letter as a formal request to deactivate and eliminate the Health Promotion track in the undergraduate Exercise Science major within the Department of Human Sciences in the College of Education and Human Ecology. After consulting with the faculty in Exercise Science, and the Chair of the Department of Human Sciences, there is consensus that we take this action. We respectfully request the deactivation formally be in effect commencing with **Summer Semester, 2017.**

As the coordinator of the undergraduate program in Exercise Science, I make this request for two reasons. First, in **the last 5 years less than 8 students** we have admitted to the Exercise Science major have opted to elect the Health Promotion track. Second, approximately three years ago the Department of Human Sciences began offering a **new major** that combines key academic and practical elements from Health Promotion, Human Nutrition, and Exercise Science (HPNES). The HPNES major has proven popular with students and we expect it to grow considerably in the coming years. Many students that might have elected to major in Health Promotion are now electing our new HPNES major.

For any student that is currently in the Health Promotion track that will not be finished with the program and graduated by Summer Semester, 2017 our faculty has agreed that they will be offered full and unconditional acceptance into the HPNES major. Additionally, any necessary coursework exceptions will be made in order to not unduly slow down the graduation dates for these potential students.

Currently, there are less than five undergraduate students in the Health Promotion track of Exercise Science, all junior and senior rank. The faculty members in Exercise Science are committed to finishing these students in their chosen major of Health Promotion, and all necessary and required courses and internship supervision will be provided to these students.

The faculty in Exercise Science regrets that we are no longer able to offer the Health Promotion track, but we believe the new HPNES major allows for greater cross-department faculty curricular collaboration, and also provides a more appealing major for our undergraduate students. Additionally, deactivating and eliminating the Health Promotion track will advantage us to utilize our resources most effectively.

Please let me know if you have any questions or require clarification with regard to this request.

Sincerely,

Steven T. Devor, Ph.D., FACSM
