Digital Flagship University FAQs

- ▶ What is the Digital Flagship University initiative?
- ▶ How does this initiative support the university's strategic plan?
- ▶ How will students benefit?
- ▶ How will faculty and staff benefit?
- ▶ How will the iPad program work?
- ▶ Is Ohio State committed to only one kind of technology?

Ohio State and Learning Tech: A History

The Ohio State community is in a prime position to leverage the many opportunities provided by the Digital Flagship Initiative. The projects below are just a sampling of how our university's faculty, staff and students have been innovating with learning technology so far:

Impact Grants

Between 2010 and 2015, Ohio State's faculty and staff used Impact Grants to transform students' learning. These projects leveraged adaptive online systems, mobile technology, and emergent teaching methods.

Innovation Center

In 2016 Ohio State's largest active learning center was opened to the campus community. This space was created for courses that would facilitate collaborative, engaged learning through wireless technology and lots of mobility.

Affordable Learning Exchange

Digital learning materials can keep up with the pace of a rapidly changing industry. They can streamline delivery so students have all of their learning content on the first day of classes. They can also save students millions.

Students Learn Swift for HackOHI/O

Competitors in Ohio State's signature hackathon prepared for the event by learning Apple's Swift coding language. An Apple engineer hosted the two hour workshop so students from across the university could learn from the best.
